ABSTRACT STATEMENT

This The concept and the reality of the Metaverse have become more than a trending topic in technology. Since 2021, the Metaverse has continued to gain traction daily because many people have come to believe it is the next internet iteration. It is pertinent to mention that part of the massive traction that the Metaverse has gained over the years stemmed from the social media giant Facebook, changing its name to Meta.

The Metaverse runs on blockchain technology and is still in its early stages. Analysts have speculated that the metaverse market value will exceed \$1.5B by 2030 .

These speculations will likely happen because the internet is transitioning fast from web2 to web3. Already, web2 is a place where people interact, build, belong to communities, collaborate, socialize, and educate one another. Therefore, with the transition from web2 to Web3, our interaction methods in the digital world will evolve.

Phenomenal metaverse projects like the CV metaverse will be one of the few ways users can access new levels of interactions, socialization, and collaborations on the internet. Hence, if you are ready to have the best virtual experiences in the digital world, investing in and belonging to the CV metaverse community is the way to go.

This whitepaper contains the most important details you need to know about the revolutionary CV metaverse project. It clearly explains how this phenomenal project has the cutting-edge CV Token at its core.

INTRODUCTION

● WHAT IS THE CV TOKEN (CVT)?

CV Token is the original digital currency issued by CVtrade.io, referred to as CVT, and is a decentralized blockchain digital asset based on BSC Chain. The existing total supply is 50 million and cannot be issued additionally. Each destruction cycle is based on the overall platform income of the CVToken platform in the current cycle, and CVT is destroyed in a fixed proportion. The destruction record will be announced as soon as possible, and users can query through the blockchain browser, to ensure openness and transparency.

INTRODUCTION

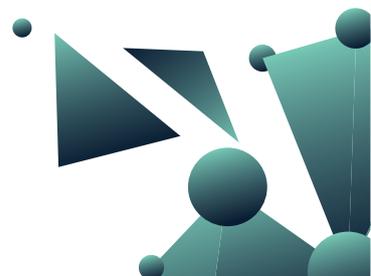

● WHAT IS METAVERSE?

The Metaverse is a digital world created from a blend the various elements from our natural world, Augmented Reality (AR) and Virtual Reality (VR). The concept originated from a 1992 novel by Neal Stephenson, Snow Crash. Stephenson used the term to describe the meeting place of avatars in virtual worlds and 3D buildings.

The Metaverse is technically an extension or a better version of what happens on the web2 internet; for instance, shopping using virtual currencies, connecting with others, gameplays, entertainment, etc. However, the Metaverse presents a better version of these things by allowing users to see and interact with them in 3D.

It provides a virtual reality space, allowing users to interact in a computer-generated environment. This interaction happens in real time. It is a collective virtual shared space created by combining virtually enhanced physical reality and physically present virtual reality.

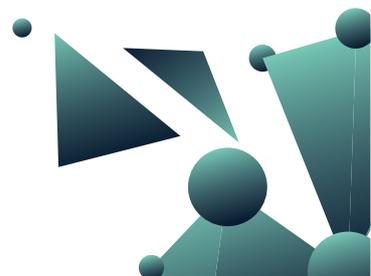

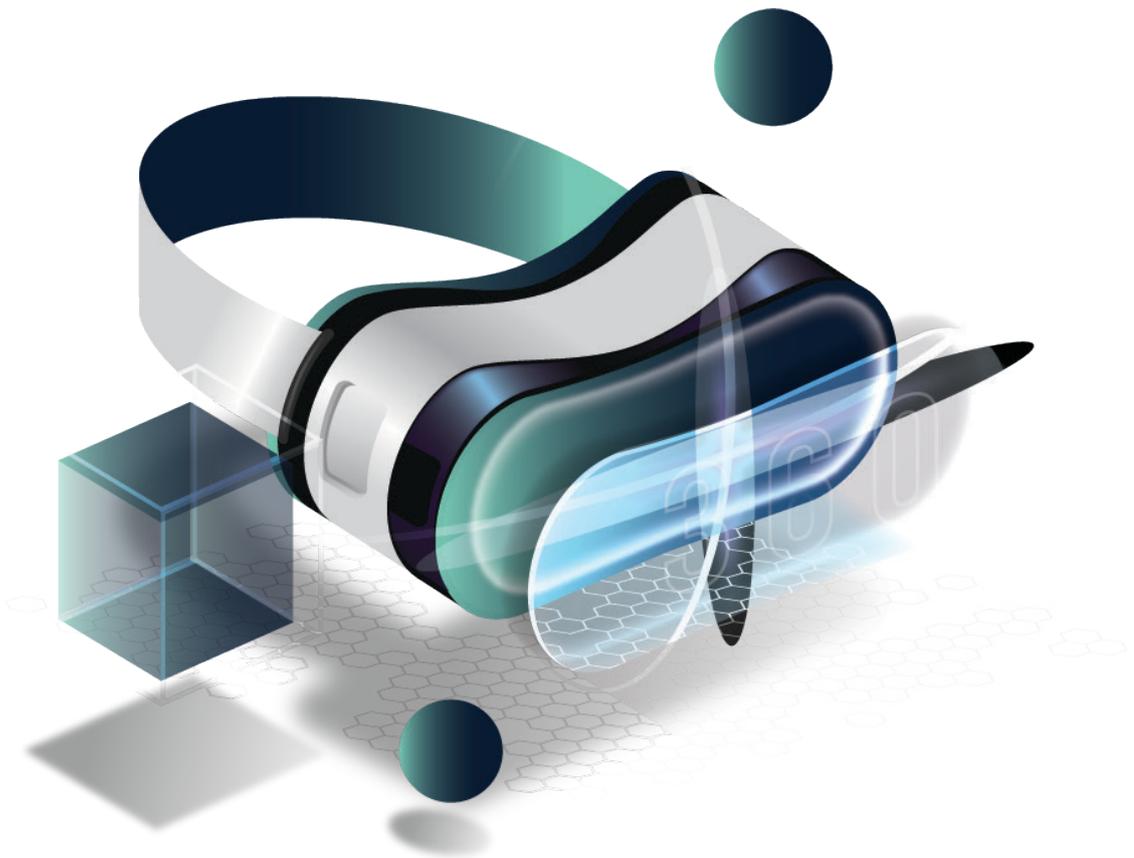

Hence, considering the concept on a larger scale, the Metaverse is beyond a mere social network. It is a virtual world that enhances how we interact and connect over the internet. One can access this world using virtual reality headsets, computers, and mobile devices.

INTRODUCTION

● INTRODUCTION TO CVT IN METaverse?

The use of CV Token in metaverse is the intersection point of virtual worlds and realities and blockchain technology. CVT aims to redefine how we interact digitally, perform economic transactions, and enhance user experiences. The currency powering the use of CV Token metaverse economy is the CV Token(CVT).

FEATURES AND FUNCTIONS OF CVT

Digital Ownership

Members of the CVT metaverse can own, buy, and sell virtual assets with the Metaverse using the CV Tokens. Users can hold and trade digital assets like avatars, in-game items, and real estate.

Economy

The life of the CVT metaverse economy is the CV Token (CVT). The CV Token is the native digital currency used for transactions in the CVT metaverse. CVT enables users to trade, sell, and buy digital goods and services within the Metaverse.

Governance

A considerable part of the CVT metaverse is decentralization. In the Metaverse, everyone is given equal opportunities to participate in community building and development in various ways. One of the ways users can participate is by holding CV Tokens. Users with CV Tokens can participate in the decision-making process and vote on updates and community initiatives of the CVTmetaverse.

Virtual Transactions & Virtual Economy

CV Tokens allow users to carry out fast, hitch-free, secure, and efficient transactions within the CVT metaverse. Users can easily trade, sell, and buy virtual assets within the Metaverse using their CV Tokens.

The CVT metaverse's virtual economy runs on the power of the CV Token. The token allows users to participate in economic activities and commerce within the Metaverse.

Rewards and Incentives

The CVT metaverse rewards its participants with CV Tokens when they participate in various activities within the Metaverse. Some of the activities that users can join in within the Metaverse to earn free CV Tokens include event participation, quest completion, and community contribution.

USES OF THE CV TOKEN

TRADE VIRTUAL REAL ESTATE

As a member of the CVT metaverse, you can use the CV Tokens to buy virtual lands in the Metaverse. In addition, you can build and develop virtual properties for monetization in the Metaverse. The Metaverse offers a thriving virtual real estate market to users wanting to own personal, rental, or business virtual properties.

BUY/SELL VIRTUAL GOODS & SERVICES

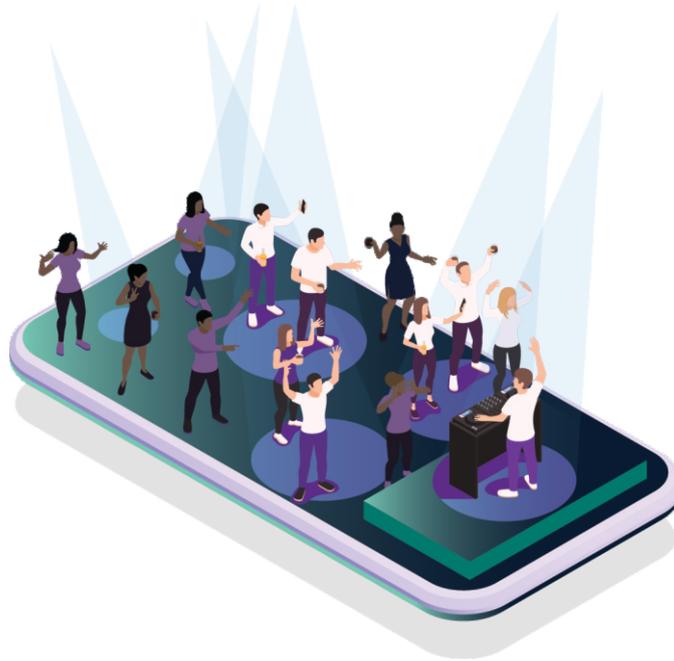

The CV Tokens allow users to sell and buy virtual products and services in the Metaverse. The Metaverse has a vibrant e-commerce system containing retail stores where users can purchase virtual clothes, accessories, and other digital products to create a more personalized avatar. The ability to buy these items and personalize your avatar will give users enhanced virtual reality experiences.

USES OF THE CV TOKEN

ATTEND VIRTUAL EVENTS AND EXPERIENCES

Social events are a core aspect of interaction in the CVT with metaverse. The Metaverse allows users to access virtual events, including concerts, conferences, exhibitions, etc., using their CV Tokens. You can use the tokens to purchase tiered attendance tickets for events. The CV Tokens allow you to enjoy a vibrant and completely immersive social environment within the Metaverse.

EARN REWARDS

Users who participate in events within the Metaverse will earn CV Tokens as incentives and rewards. You can use these freely earned tokens as an exchange medium within the CVT metaverse. Users can buy digital goods, services, and virtual real estate properties with free CV Tokens.

BENEFITS OF CVT

INCREASED USER ENGAGEMENT

Users who own CV Tokens and actively participate in the CVT metaverse activities get rewards and incentives in the form of more CV Tokens. The incentives serve as their benefits for being active participants in the CVT metaverse activities.

ECONOMIC OPPORTUNITIES

Owning CV Tokens opens you up to many opportunities in the CVT metaverse. These opportunities allow you to earn passive income and make money trading digital assets and currencies.

TOKENOMICS

CV token aims to reach out community's looking for a decentralised payment solution and blockchain ~~planning~~ and metaverse, CVT utility in crypto banking is our future

Blockchain	BINANCE
Symbol	CVT
Token Name	CV TOKEN
Total Supply	50,000,000

BURNING MECHANISM

- 5% will be burned every month from total supply.
- With the passive burning every month, the internal Price of CV Token will continue to increase.

5% X 12 month = 60% (30,000,000) Token Will be Burn.

PRESALE

The Presale will be done in BEP20 USDT on multiple platforms worldwide.

Presale Schedule

All times below are India Standard Time (IND), UTC+8 hours.

DATE	TASK
10-10-2023	Confirm the start of the CV Token project.
15-10-2023	The Initial draft white paper completed and circulated to potential investors.
20-10-2023	Announce the CV Token Presale plan and release white paper to the public.
26-10-2023	Presale Start

PRESALE MODULE

PRESALE	10,000,000
PRESALE DURATION	365
STRAKING PREIOD	400

FUNDS

- 50% of the funds will be used to build the CV Token/Exchange platform and upgrade the system, including team recruiting, training, and the development budget.
- 35% will be used for CV Token/Exchange branding and marketing, including continuous promotion and education of CV Token blockchain innovations in industry mediums. A sufficient budget for various advertisement activities will be to help CV Token become popular among investors and attract active users to the platform.
- 15% will be kept in reserve to cope with an emergency or unexpected situation that might come up.

ALLOCATION

TEAM

ASHOK JOSHI
CEO & FOUNDER

(Joshi in Crypto Community) [LinkedInProfile](#)

Results-oriented IT professional with over 20 years of experience in network marketing and a current focus on the crypto exchange industry. Skilled in managing complex networks, implementing security measures, and optimizing network performance. Has depth in collaborating with cross-functional teams and leveraging technological advancements to drive business growth. Strong problem-solving and communication skills with a proven track record of delivering high-quality results.

JAGLAL BHARTIY
CO - FOUNDER

(Jaglal in Crypto Community) [LinkedInProfile](#)

As a highly motivated individual with a strong work ethic and a passion for both technology and business, I am always striving to achieve my best work. With a proven track record of delivering high-quality results, I am a results-driven professional who thrives in fast-paced, dynamic environments.

As a self-described workaholic, I constantly seek new challenges and opportunities to grow and develop my skills. My background in tech and business has given me a unique perspective that allows me to approach problems from multiple angles and find innovative solutions. I always want to collaborate with like-minded individuals and companies who share my drive for excellence. If you are looking for someone who can get the job done and is always looking for ways to improve, let's connect!

TEAM

ROHIT SINGH
COO

(Rohit in Crypto Community) [LinkedInProfile](#)

I responsible for strategic leadership, operational oversight, process optimization, resource allocation, and risk management within a corporate structure. Reporting directly to the CEO, the COO collaborates with other C-suite executives to execute the company's vision and ensure long-term viability.

HIMANSHU KUMAR
CTO

(Himanshu in Crypto Community) [LinkedInProfile](#)

I am an open-minded, strong team player who respects new ideas and technologies and is always ready to get his hands dirty with the craziest idea. I am always committed to the projects that I am working on. I am always willing to meet new people and get involved in business projects that can use my expertise to make an impact.

TEAM

(Sumit in Crypto Community) [LinkedInProfile](#)

SUMIT AGRAWAL
CMO

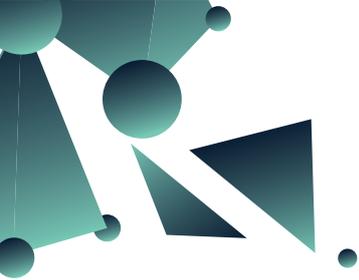

Passionate about leveraging the power of social media and search engine optimization to drive impactful results. With over one year of hands-on experience managing social media platforms and implementing effective SEO strategies, I thrive in creating engaging content and optimizing online visibility.

(Nikhil in Crypto Community) [LinkedInProfile](#)

NIKHIL KUMAR
COMPLIANCE

With extensive experience in compliance, I specialize in navigating regulatory landscapes with precision and integrity. My role involves analyzing regulations, mitigating risks, and devising robust compliance strategies. Through collaboration, I cultivate a culture of compliance at all levels of the organization. I prioritize continuous learning, staying abreast of industry trends through conferences and networking. Backed by a proven track record of success, I am dedicated to upholding the highest standards of regulatory compliance.
